

TACROM

TACROM – Reinforced Crowd Management System. TACROM has the same features as CROM, but is reinforced with a 1.3mm stainless steel wire in every net mesh and a 10mm steel wire at the top and bottom. TACROM is designed to withstand attacks with e.g. wire cutters and pyrotechnics.

Though the net is reinforced, it is still a spectator-friendly system.

The system is especially used for high-risk crowd management and riot control. The system can also be mounted with the Quick-Release function for emergency evacuation.

The system comes with special customizations and can be installed in angles up to 35 degrees.

System data		Accessories included
Height:	1.3m	2 pulley mechanisms, Svero – 1.6t
Length:	up to 35m	
Weight:	50kg at 35m	
Net mesh size:	60mm	
Breaking force:	>50kN	
Flame resistance:	Tested according to DIN 4102-1 B1 and B2	
Operating temperature:	-40° C to +60° C for storage and use	
Colour:	Black
